Sharon, I reached out to Doug because for other FYRs, we haven't had the PFAS investigations impact the protectiveness statements for the OUs where PFAS wasn't considered as part of the original remedy. The protective/short-term protective determinations therefore stem from the issues related to the remedy in the RODs. The new language is more consistent with what we've said for the other FYRs. I'm happy to discuss more.

Doug, I think the changes look good. Thank you for making them!!

Thanks Doug. Are the ones that are "Protective" listed as such because the groundwater is not expected to be impacted by PFAS?

Chloe,

Based upon our discussion I revised the BNL FYR Protectiveness letter. I included language from the Griffiss FYR ltr regarding PFAS.
I also edited the determinations on some.

Please take a look.

Thanks,

doug
